PROFESSIONAL SUMMARY

Motivated Artificial Intelligence and Machine Learning student with strong foundation in Python programming, machine learning, and data analytics. Experienced in developing intelligent systems including Fake News Detection using NLP, Customer Churn Prediction, AI-Based Travel Management System, and health data analysis using Exploratory Data Analysis. Skilled in building predictive models and extracting insights from data. Seeking an opportunity to apply technical and analytical skills in a dynamic IT organization.

KEY SKILLS

Artificial Intelligence • Machine Learning • Natural Language Processing • Data Analysis • Predictive Modeling • Data Visualization • Python Programming • Problem Solving

TECHNICAL SKILLS

- **Programming:** Python, SQL, Java (Basic)
- **Machine Learning:** Machine Learning Algorithms, NLP, Feature Engineering, Model Evaluation
- **Data Science:** Pandas, NumPy, Matplotlib, Exploratory Data Analysis
- **Tools:** Git, GitHub, Jupyter Notebook, VS Code, Flask
- **Core Concepts:** Data Structures, DBMS, Artificial Intelligence, Software Development Lifecycle

PROJECTS

- **Fake News Detection Using NLP** – Developed a machine learning model to classify news articles as real or fake using NLP techniques. Implemented text preprocessing, feature extraction, and a BERT-based classification model. Technologies: Python, NLP, BERT, Pandas, Scikit-learn.
- **Customer Churn Prediction System** – Built a predictive machine learning model to identify customers likely to discontinue services. Applied data preprocessing, feature scaling, and classification algorithms and created a Flask web app for predictions. Technologies: Python, Scikit-learn, Pandas, Flask.
- **AI-Based Travel Management System** – Designed an AI-powered travel planning system that provides intelligent recommendations for optimized travel routes and automated decision support. Technologies: Python, AI Concepts.
- **Exploratory Data Analysis of Lifestyle and Demographic Factors Affecting Diabetic Risk** – Conducted EDA on healthcare datasets to identify relationships between lifestyle habits and diabetic risk using data visualization and statistical insights. Technologies: Python, Pandas, Matplotlib.

CERTIFICATIONS

- Introduction to Artificial Intelligence – Infosys Springboard
- Introduction to Modern AI – Cisco Networking Academy
- Software Engineering & Agile Software Development – Infosys Springboard
- SCRUM Course: Cybersecurity Fundamentals – Infosys Springboard
- AI Hackathon 2025 – State Level, Kalpataru Institute of Technology

EDUCATION

Bachelor of Engineering (B.E.) – Artificial Intelligence & Machine Learning
Kalpataru Institute of Technology, Tiptur, Karnataka
CGPA: 9.0 / 10 | Expected Graduation: 2027

SOFT SKILLS

Communication • Teamwork • Problem Solving • Time Management • Adaptability
